## **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee. Authorization for this examiner's amendment was given in a telephone interview with M. Clodfelter on 3-3-2006.

- 2. The application has been amended as follows:
- Claim 1 has been amended as follows:
- —1. (currently amended) A water sanitizing apparatus comprising:

a body containing a series of vertical, water-carrying tubes eircularly circumferentially arranged around a hollow central region,

a base for said body,

a top cap for said body, said base and said top cap configured to channel a flow of water through said water-carrying tubes so that said flow of water is alternately upward and downward through said water-carrying tubes, with a last of said tubes channeling said flow of water into said hollow central region,

a bubble separator in said hollow central region and configured for removing gases from said flow of water,

an ozone generator in said hollow central region, and

Art Unit: 1723

a mixing device coupled to provide ozone from said ozone generator to said flow of water.—

- Claim 9 has been amended as follows:
- —9. (currently amended) An assembly for purifying water for spas, hot tubs, swimming pools and the like comprising:

an extruded body having a plurality of vertical, elongated water- carrying channels circumferentially arranged around a central region,

a top cap and a base for said body, said top cap and said base cooperating between a water inlet and a water outlet to develop a water flow through said water-carrying channels that alternates in upward and downward directions between adjacent said water-carrying channels and into a compartment defined by said central region where water flows last before flowing through said water outlet,

An an ozone generator mounted in a last of said water carrying channels said compartment,

a bubble separator mounted in said last of said water-carrying channels compartment, and a mixing device mounted in said water inlet to receive said water flow, and coupled to said ozone generator for mixing at least ozone in said water flow.—

- Claim 13, line 5, "water carrying channels" has been replaced with —compartment—.
- Claim 15, line 2, "water carrying channels" has been replaced with —compartment— and in line 4, "water carrying channels receive" has been replaced with —compartment receives—.

Art Unit: 1723

- In the abstract, line 2, "circularly" has been replaced with —circumferentially—, line 6, "seperator" has been replaced with —separator— and at the end of the abstract, the "," has been replaced with —.—.
- The TITLE has been changed to WATER PURIFYER WITH EXTRUDED BODY HAVING CIRCUMFERENTIALLY ARRANGED TUBES—.
- Specification, page 1, line 12, "circularly" has been replaced with —circumferentially—;
- Specification, page 13, line 22, "circularly" has been replaced with —circumferentially—.
- Specification, page 7, line 8, the following has been added:
- -Fig. 10 is a view of the venturi.
- Specification, page 17, line 18, has been amended as follows: —that described in Applicant's pending application <u>09/717,903</u>, filed 11/20/2000, now U.S. Patent 6,428,756 wherein—.

## Required Drawing Changes

3. The following changes to the drawings have been approved by the examiner and agreed upon by applicant: applicant will provide proper formal drawings including figures 1-10. In order to avoid abandonment of the application, applicant must make these above agreed upon drawing changes.

Art Unit: 1723

## Reasons for Allowance

- 4. The following is an examiner's statement of reasons for allowance:
- The closest cited art—EP 0269941A1 and Taylor et al. (U.S. 5,766,490)—fail to anticipate or render obvious, alone or in any proper combination, the vertical tubes of the body circumferentially-arranged around a hollow central region, wherein the region (i) receives the flow of water from the last of the tubes and (ii) includes the bubble separator and the ozone generator therein—within the apparatus of claim 1.
- The aforementioned closest cited art also fails to anticipate or render obvious, alone or in any proper combination, the vertical elongated channels of the extruded body circumferentially-arranged around a central region, wherein the region defines a compartment that (i) receives the flow of water lastly before the water exits via the water outlet and (ii) includes the bubble separator and the ozone generator—within the apparatus of claim 9.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee.

Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

5. Contact Information:

• Examiner Mr. Terry K. Cecil can be reached at (571) 272-1138 at the Carlisle campus in

Alexandria, Virginia for any inquiries concerning this communication or earlier

communications from the examiner. Note that the examiner is on the increased flextime

schedule but can normally be found in the office during the hours of 8:30a to 4:30p, on at

least four days during the week M-F.

• Wanda Walker, the examiner's supervisor, can be reached at (571) 272-1151 if attempts to

reach the examiner are unsuccessful.

• The Fax number for this art unit for official faxes is (571) 273-8300.

• Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published

applications may be obtained from either Private PAIR or Public PAIR. Status information

for unpublished applications is available through Private PAIR only. For more information

about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access

to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197

(toll-free).
